

SURFACE ORNAMENTATION

Surface ornamentation is the application of decorative elements to the surface of a material, especially fabrics and garments, to enhance its aesthetic appeal, add value, and create unique textures and details. Common techniques include embroidery, applique, printing, and the use of embellishments like beads, sequins, and mirrors.

HAND EMBROIDERY

Hand embroidery is a centuries-old decorative textile art that involves creating designs, patterns, or images on fabric using a needle and thread.
